Call for Nominations 2016 EFCE Excellence Award in Mechanics of Particulate Solids

Following the successful calls for nominations in 2010 and 2012, the European Federation of Chemical Engineering (EFCE) is pleased to issue a third invitation call for nominations for the **Excellence Award in Mechanics of Particulate Solids**.

This triennial award aims to recognise a PhD thesis or associated paper(s) of a researcher or engineer, which demonstrate(s) an outstanding contribution to research and/or practice in Mechanics of Particulate Solids.

The award consists of a certificate, the sum of EUR 1,500, a travel grant of up to EUR 500 and a fee waiver to attend the International Congress on Particle Technology, PARTEC 2016, which will be held in Nuremberg, Germany, from 19 to 21 April 2016.

The award will be presented at the congress where the winner will be invited to deliver a presentation following the award ceremony.

Nominations may be submitted by any PhD supervisor at a PhD-awarding institution in an EFCE member country or by a member of an EFCE member society to Ines Honndorf (email: honndorf@dechema.de).

The nominated PhD thesis or paper(s) must address a topic relevant to the field of Mechanics of Particulate Solids. Only PhD theses or paper(s) published between November 2012 and November 2015 are eligible for nomination.

Closing date for nominations: **30 November 2015**.

Further information about the nomination procedure, eligibility, supporting documentation, etc., can be obtained from the EFCE website at <http://www.efce.info/ExcellenceAwardMPS.html>.

About chemical engineers

Chemical, biochemical and process engineering is the application of science, maths and economics to the process of turning raw materials into everyday products. Professional chemical engineers design, construct and manage process operations all over the world. Oil and gas, pharmaceuticals, food and drink, synthetic fibres and clean drinking water are just some of the products where chemical engineering plays a central role.

About EFCE

Founded in 1953, The European Federation of Chemical Engineering (EFCE) is a non-profit-making association, whose object is to promote co-operation in Europe between non-profit-making professional scientific and technical societies in 30 countries for the general advancement of chemical engineering and as a means of furthering the development of chemical engineering.
